

An email from Mike, who is converting Huntington's work to text files.

Greetings from Australia

Spiritual letters extend over two parts (volumes 13 & 14). There is only 20 of the about 80 letters published in vol 13 the remained being "in work." The master file of a similar quantity of letters in vol 14 has gone missing and consequently the volume is expected to hand at the end of November (2007) when the friend is next over to see me. It will require scanning (380-390 pages), OCR and proofing &c before posting on the web.

As you can see I live in Australia (Adelaide South Australia) and the web site is just me so things take a while, hope you can be patient.

Meanwhile could I recommend the James Bourne letters and some background material in his memoire and also there is some interesting and enlightening material on same in "More than Notion"

Hope you continue to appreciate the old paths material

Take care

Mike
